

IMPORTANT NOTICE

NEW WELL DRILLING

MERKLIN STREET RESERVOIR SITE

WHAT'S HAPPENING?

EPCOR White Rock is drilling a new well at the Merklin Street reservoir site. This project is part of our approved 2011 – 2013 capital plan, and EPCOR's continuing efforts to ensure your water service is reliable and safe. We regret any inconvenience.

WHEN?

Work will take place between 7:30 am and 5:30 pm from January 30, 2012 to April 11, 2012 unless we experience unforeseen delays. Some work beyond these hours may be required; however we will make every effort to complete daily tasks by 5:30 pm each day.

HOW WILL I BE AFFECTED?

There will be some traffic disruptions while construction vehicles access the site. Please refrain from parking in front of the EPCOR reservoir site on the west side of the 1500 block of Merklin Street.

There should be no water service interruptions as a result of this work and your water remains safe to consume during this period.

ARE THERE ANY SAFETY CONCERNS?

Equipment and materials will be stored in the area during this time. Please remind all members of your household to use caution in the area due to the presence of work vehicles. EPCOR's priority is to complete this work safely and efficiently.

WHO DO I CALL FOR MORE INFORMATION?

For more information, call EPCOR at (604) 536-6112.
